Okay.

You mean regular ground shots, and then use word to put a line around the impact areas. Or pint to them.

Mike, photos with lines drawn on them showing impacts would be great. A movie is okay but prefer photos. Thanks

Sarah

Are you going to be able to make it to Telluride before winter set sin to look at the medical center site. If so let me know some dates.

If you don't think so, let me know that soon also so I can go down and be a movie start making a video for you.
